Ex:8 NMAP to Discover Live Hosts using Nmap Scans (ARP, ICMP, TCP/UDP) on the TryHackMe Platform

8/10/26

AIM:

To Configure a Wireless LAN using a linksys wireless Router in cisco Packet Tracer and Securdy connect three PCs using a WEP security key.

Observation:

* A linksys Wireless Router was connected to three PC's to form a wireless LAN.
* The router IP address was configured as 192.168.0.1
* The SSID of the wireless network was configured as Mother Network.
* WEP Security was enabled on the wireless router with the Security key 0123456789.
* Static IP addresses were assigned to the three PC's

→ PC0 - 192.168.0.2

→ PC1 - 192.168.0.3

* The subnet mask was set to 255.255.255.0 for all PC's.

* The ~~and~~ default gateway was set to 192.168.0.1 for all PC's.

* All three PC's were connected to the Network using the configured WEP key.

* The wireless connection was successfully established between the PC's and the router.

RESULT:

Thus, the wireless LAN was successfully configured using a Linksys wireless Router in Cisco Packet Tracer, and all three PC's were connected securely to the wireless Network.
